

Hand Made Octopus

1. Trace your hands on a piece of construction paper. (You can skip your thumbs if you want to make sure your octopus has 8 legs – if you add the thumb it'll have 10!)

2. Carefully cut out your hand tracings.

3. Glue the cut-outs together so that all of your fingers (the octopus's legs) are visible.

4. Draw a face on your octopus.

5. Add a string to hang your octopus on display if you wish.
